Serene[™]
BREAST IMPLANT

A **Structured Saline** Breast Implant

The sale and distribution of this device is restricted to users and/or user facilities that provide information to patients about the risks and benefits of this device in the form and manner specified in the approved labeling provided by Bimini Health Tech.

Uniquely designed, with an internal structure

The Puregraft **Serene Breast Implant** is as unique as you are. Thoughtfully engineered with structured internal layers that provide the desired shape that you want, with the added confidence and safety of saline.

Why Serene Is Different:

- **Unique Design:** Advanced internal structure controls movement of the saline and supports the implant edge, to minimize rippling and wrinkling
- **Customizable:** Your surgeon can adjust the height and projection of the implant to achieve your desired results
- **Safety:** In the event of a deflation or leak, saline is harmlessly reabsorbed by the body
- **Maintenance:** No MRI required for rupture monitoring

Backed by the
Pure Confidence
Warranty.

WARNING:

- Breast implants are not considered lifetime devices. The longer people have them, the greater the chances are that they will develop complications, some of which will require more surgery.
- Breast implants have been associated with the development of a cancer of the immune system called breast implant-associated anaplastic large cell lymphoma (BIA-ALCL). This cancer occurs more commonly in patients with textured breast implants than smooth implants, although rates are not well defined. Some patients have died from BIA-ALCL.
- Patients receiving breast implants have reported a variety of systemic symptoms such as joint pain, muscle aches, confusion, chronic fatigue, autoimmune diseases and others. Individual patient risk for developing these symptoms has not been well established. Some patients report complete resolution of symptoms when the implants are removed without replacement.
